The following text is adapted from Charles Dickens's 'A Christmas Carol.' Ebenezer Scrooge is visited by the Ghost of Christmas Present.

"Spirit," said Scrooge submissively, "conduct me where you will. I went forth last night on compulsion and I learnt a lesson which is working now. Tonight, if you have anything to teach me, let me profit by it."

The Ghost then smiled and, with a wave of his great hand, all the hideous and appalling things had vanished. As Scrooge looked around, he found himself in a bustling and joyous Christmas market.

4 Mark for Review

Which choice best states the main purpose of this passage from 'A Christmas Carol'?

A: To portray Scrooge's fear and hesitation in the presence of the Ghost of Christmas Present

B: To illustrate Scrooge's change in mindset, accepting the lessons the spirits are teaching and his willingness to change

C: To depict the Ghost of Christmas Present's power to control and manipulate Scrooge's surroundings

D: To emphasize the stark contrast between Scrooge's solitary existence and the cheerful Christmas market scene

The following text is adapted from Murasaki Shikibu's 11th century novel *The Tale of Genji*. A courtier named Genji is reflecting on his romantic relationships.

Genji, the Shining Prince, was not a man to find satisfaction in the love of just one woman. His heart was always on the move, seeking out new experiences and emotions. It was this passionate curiosity that had led him to such a wide range of women, from high-ranking court ladies to humble village maidens. His love was like a river, flowing freely, sometimes calm, and at other times, wild and turbulent.

5 Mark for Review

Which choice best states the main idea of the text?

A: The text aims to highlight Genji's dissatisfaction with his romantic relationships.

B: The text describes Genji's relentless pursuit of love and his attraction to a variety of women.

C: The text portrays Genji's regret over his romantic involvements with women of different social statuses.

D: The passage focuses on the negative consequences of Genji's infidelities and his inconsistent behavior.

The following text is adapted from Truman Capote's 1958 novella 'Breakfast at Tiffany's.' Holly Golightly, a young woman in New York, is speaking with the narrator about her life and dreams.

"I've got the most terrifying news. I'm going to be absolutely broke for the next month. It's really put me in a terrible spot. I don't know what on earth I'm going to do," she fretted. "I don't suppose you'd know anyone who'd like to buy a slightly used mink coat?"

6 Mark for Review

Which choice best articulates the central idea of this passage?

A: To depict Holly Golightly's immediate financial distress and her frantic search for solutions.

B: To demonstrate the lavish lifestyle that Holly Golightly leads, evidenced by her ownership of a mink coat.

C: To show Holly Golightly's tendency to exaggerate her problems, as seen in her reaction to being broke and selling her mink coat.

D: To emphasize the narrator's role as a confidant to Holly Golightly, as she shares her financial worries with him.

Text 1

The Treaty of Sistova, signed in 1791, ended the Ottoman-Habsburg wars and marked a significant shift in the balance of power in Asia. The treaty led to the Habsburg Empire gaining significant territories in the Balkans, while the Ottoman Empire lost significant ground. This redistribution of power had far-reaching implications on the political landscape of Asia, leading to a period of Habsburg dominance in the region.

Text 2

Historian John K. Smith argues that the Treaty of Sistova caused more than just a territorial shift. He suggests that the treaty significantly changed the socio-political dynamics of Asia. According to Smith, the Habsburg dominance led to cultural and political shifts in the region, with the influence of Western ideologies becoming more prominent. The impact of the treaty, Smith argues, extends beyond mere geographical boundaries.

7 Mark for Review

Based on the texts, how would John K. Smith (Text 2) most likely respond to the perspective on the "impact of the Treaty of Sistova" discussed in Text 1?

A: By stating that it overemphasizes the significance of territorial gains and losses in determining the impact of historical events

B: By suggesting that it doesn't fully capture the socio-political changes brought about in Asia as a result of the Treaty of Sistova

C: By arguing that it downplays the role of the Ottoman Empire in shaping the political landscape of Asia post-treaty

D: By affirming its view but adding that the Treaty also led to significant economic changes in the region

Opportunity cost, a critical concept in economics, refers to the potential benefits an individual, investor, or business misses out when choosing one alternative over another. While financial reports do not show opportunity cost, business owners can use it as a decision-making tool to help them maximize their potential profits. For instance, if a clothing manufacturer decides to produce more trousers, the opportunity cost is the amount of shirts that are not produced as a result.

8 Mark for Review

Which choice best states the main purpose of the text?

A: To argue that opportunity cost should be included in financial reports to provide a more comprehensive picture of a business's financial health

B: To explain the concept of opportunity cost and its practical application in business decision-making processes

C: To suggest that clothing manufacturers should consider the opportunity cost of producing trousers over shirts

D: To propose a new method for calculating opportunity costs in the manufacturing industry

Steve Jobs, co-founder of Apple Inc., was known for his relentless pursuit of perfection. With an eye for detail, he had a knack for connecting technology with aesthetics. His approach was often unconventional, rejecting market research in favor of his own intuition. He believed that customers don't know what they want until you show it to them. This belief led him to create products that transformed entire industries, from music and movies to smartphones and tablet computing.

9 Mark for Review

Which choice best states the main purpose of the text?

A: To illustrate how Steve Jobs' perfectionism often led to conflicts with his co-workers

B: To argue that unconventional methods in business, like rejecting market research, are the key to success

C: To portray Steve Jobs' unique approach to product development, marked by intuition and a drive for perfection

D: To demonstrate that Steve Jobs' success was primarily due to his ability to predict future trends through the transformation of industries

Estate tax, often criticized as a 'death tax', is imposed on the transfer of an estate of a deceased person. Critics argue that it discourages savings and investment, while proponents assert that it prevents the concentration of wealth. An economic study by Prof. Elaine Maag suggests a different perspective. She found that in countries with high estate taxes, there is a higher level of wealth dispersion, contrary to the critics' claim. Maag attributes this to the fact that high estate taxes encourage charitable donations and lifetime gifts, which distribute wealth more broadly.

10 Mark for Review

In light of Prof. Elaine Maag's study on estate taxes, which of the following scenarios would most strongly support her theory?

A: A country with high estate tax reports a significant increase in wealth concentration among the top 1% of its population over the past decade. 

B: A country with high estate taxes shows a notable increase in charitable donations and lifetime gifts, along with an increase in wealth concentration. 

C: A country with high estate taxes experiences a steady growth in investment and savings, with no significant change in wealth distribution. 

D: A country with high estate taxes shows a notable increase in charitable donations and lifetime gifts, along with a decrease in wealth concentration. 

In Toni Morrison's 'Beloved', Sethe's house at 124 Bluestone Road is haunted by the ghost of her deceased daughter. The hauntings are disruptive, causing emotional distress to the inhabitants. However, when Paul D arrives and forces the spirit out, the house becomes quiet. Critics argue that the quieting of the house symbolizes Sethe's suppression of her traumatic past. Yet, when Beloved appears, the house becomes chaotic again. Some scholars suggest this indicates that confronting one's past, however painful, is necessary for healing.

11 Mark for Review

Which of the following, if true, would most directly challenge the scholars' interpretation?

A: Many readers interpret the character Beloved as a symbol of Sethe's guilt and remorse, not a representation of her past.

B: In other instances in the novel, characters confront their pasts without experiencing the same level of chaos as in 124 Bluestone Road.

C: The house at 124 Bluestone Road was built on an ancient burial ground, which could explain the supernatural phenomena.

D: Paul D's arrival at 124 Bluestone Road coincides with a decrease in supernatural events in the surrounding neighborhood.

Philosopher	Year	Method of Empirical Data Collection	Key Conclusion
John Locke	1690	Sensory perception	Tabula Rasa - humans are born without innate ideas
George Berkeley	1710	Immaterialism	Objects only exist as a perception of the mind
David Hume	1739	Skepticism	Knowledge is ultimately based on causality
Immanuel Kant	1781	Transcendental idealism	Knowledge begins with experiences but not all knowledge arises from experience

Empiricism is a philosophical approach that emphasizes experience and evidence. However, the method of collecting and interpreting this empirical data can significantly impact the resulting conclusions.

12 Mark for Review

Which choice best describes data from the table that support the concept of empiricism being dependent on the method of data collection and interpretation?

A: John Locke and George Berkeley both used different methods of empirical data collection, yet they arrived at remarkably similar conclusions.

B: David Hume's method of skepticism led him to the conclusion that knowledge is ultimately based on causality.

C: The conclusions of Locke, Berkeley, Hume, and Kant, all vary significantly, although they all collected empirical data, indicating that the method of data interpretation can shape the conclusion.

D: Immanuel Kant's method of transcendental idealism led him to the conclusion that not all knowledge arises from experience, contradicting the fundamental principle of empiricism.

The Elizabethan era, spanning the reign of Queen Elizabeth I from 1558 to 1603, is often regarded as the golden age of English history. During this period, English exploration and colonization saw a significant boom, literature and the arts flourished, and the English language expanded rapidly. A research paper published by Harvard University biologist Jane Smith in 2020 provides a new theory for the evolution of a bird ____ features called crests, prominent structures that develop when certain genes are activated during the bird's growth, leading to the formation of unique feathers on the bird's head. These crests are often used in mating displays and can vary greatly in size and shape between different species. The study suggests that the development of crests may be influenced by a combination of genetic and environmental factors. This new theory could help scientists better understand the complex processes involved in bird evolution.

While researching a topic, a student has taken the following notes:

- Metaphors were prevalent in Ancient Greek literature, used to add depth and understanding to their works.
- Homer, the author of the Iliad and the Odyssey, used metaphors extensively for vivid descriptions.
- Aristotle, in his work 'Poetics', explicitly discussed the use of metaphors and their artistic importance.
- Metaphors were used to convey abstract ideas and emotions, bridging the gap between the physical and the abstract.
- The Greek tragedy 'Oedipus Rex' employed metaphors to portray the tragic fall of the protagonist.

25 Mark for Review

The student wants to illustrate the importance of metaphors in Ancient Greek literature. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Aristotle discussed the artistic importance of metaphors in his work 'Poetics', but it was Homer who used them extensively in his works.

B: In 'Oedipus Rex', metaphors were used to depict the tragic downfall of the main character, a common technique in Greek tragedies.

C: Metaphors in Ancient Greek literature, as discussed by Aristotle and demonstrated by Homer and in 'Oedipus Rex', were used to convey abstract ideas and emotions, bridging the gap between the physical and the abstract.

D: The extensive use of metaphors in the works of Homer and in 'Oedipus Rex' added depth and understanding to Ancient Greek literature.

While researching a topic, a student has taken the following notes:

- Hybrid vehicles combine a gasoline engine with an electric motor to increase fuel efficiency.
- Electric vehicles run purely on electricity and produce zero tailpipe emissions.
- Battery electric vehicles (BEVs) do not require oil changes and have fewer moving parts, leading to potentially less maintenance.
- However, electric vehicles require high-capacity battery packs that can be expensive to replace.
- Plug-in hybrid electric vehicles (PHEVs) offer a compromise between hybrid and electric vehicles, allowing for electric-only operation for short trips and gasoline operation for longer trips.

26 Mark for Review

The student wants to explain the advantages of Plug-in hybrid electric vehicles (PHEVs). Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Electric vehicles, including PHEVs, produce zero tailpipe emissions and require potentially less maintenance due to fewer moving parts.

B: Hybrid vehicles, which combine a gasoline engine with an electric motor, are noted for their increased fuel efficiency.

C: Battery electric vehicles (BEVs), while requiring high-capacity battery packs, avoid the need for oil changes and have fewer moving parts.

D: PHEVs offer a balance, allowing for electric operation for short trips and gas for long trips, reducing overall maintenance.

While researching a topic for a history project, a student has taken the following detailed notes about Leonardo da Vinci:

- Leonardo da Vinci was an Italian polymath of the Renaissance period.
- He is renowned for his contributions to art, science, and engineering.
- Among his famous works are the Mona Lisa and The Last Supper.
- Da Vinci's notebooks reveal extensive studies in anatomy, optics, and hydraulics.
- His conceptual designs included a precursor to the modern helicopter and a tank.
- Despite many unfinished projects, da Vinci's influence on various fields remains profound.

Marine biologists have been studying the impact of rising sea temperatures on marine species. The conventional wisdom is that rising temperatures lead to higher metabolic rates and increased oxygen consumption, which can lead to hypoxia. Hypoxia, or lack of oxygen, can cause severe stress for marine species and lead to widespread die-offs.

Text 2

A team of researchers led by Dr. Sarah Greene has argued that the theory of rising sea temperatures might not be entirely accurate. While rising temperatures do increase metabolic rates and oxygen consumption, they have found evidence that marine species might also be adapting to these changes. They argue that these adaptations might mitigate the effects of hypoxia, allowing marine species to survive in warmer waters.

7 Mark for Review

Based on the texts, how would Dr. Sarah Greene's team (Text 2) most likely respond to the "conventional wisdom" discussed in Text 1?

A: By stating that the conventional wisdom is incorrect and that rising temperatures have no impact on marine species.

B: By suggesting that the conventional wisdom does not account for the potential for marine species to adapt to changing conditions.

C: By proposing that the conventional wisdom is based on outdated data and that recent findings have shown that marine species are not affected by hypoxia.

Hydraulic fracturing, commonly known as fracking, is a gas engineering technique used to extract natural gas from deep underground. The process involves injecting a high-pressure fluid into a wellbore to create cracks in the deep-rock formations. This allows natural gas to flow freely from the well. However, environmental engineer Dr. Samantha Green hypothesizes that the process can lead to groundwater contamination. To support her hypothesis, she examined areas with a high concentration of fracking activities and found a correlation between the presence of fracking and higher levels of certain contaminants in the groundwater.

Which of the following, if true, would most strongly support Dr. Green's hypothesis?

A: At several sites not included in the study, groundwater contamination is prevalent, but no fracking activities are reported.

B: In a region where fracking was recently introduced, tests showed an increase in the same contaminants found in the areas studied by Dr. Green.

C: In areas where fracking has been banned, groundwater contamination levels have remained constant over the years.

D: In regions distant from fracking sites, the groundwater is found to be free of the contaminants Dr. Green studied.

Scholar	Year	Estimation Method	Approximate Value (USD)
Mensah	2019	cultural significance	20-50
Ahmed	2017	material analysis	10-30
Barrett	2002	market-demand	70-100
Rayfield	2012	cultural significance	25-55

The significance of the basketmaker in African societies varies depending on the cultural and economic factors of each society. Scholars like Kofi Mensah and Selena Ahmed argue that the basket-making technique and the materials used can greatly affect the economic value of the baskets. However, determining the economic value can be challenging as it may be significantly influenced by the methodology used in determining that value.

12 Mark for Review

Which choice best describes data from the table that support Mensah and Ahmed's suggestion?

A: The value estimates produced by Mensah and Rayfield were similar to each other, while the estimates produced by Barrett and Ahmed each differed substantially from any other estimate.

B: In their study, Ahmed used material analysis to produce an estimated value range with a minimum of 10 USD and a maximum of 30 USD.

C: The estimated maximum value produced by Mensah exceeded the estimated maximum produced by Rayfield, even though both researchers used the same method to generate their estimates.

D: The study by Barrett used market-demand and produced the lowest estimated maximum value, while the study by Mensah used cultural significance and produced the highest estimated maximum.

In Margery Williams's classic children's book, *The Velveteen Rabbit*, the eponymous character is an anthropomorphic stuffed toy who desires to become real. The book explores the theme of authenticity and the transformative power of love through the rabbit's journey. The Rabbit learns from the wise, old Skin Horse that toys can become real if they are truly loved by a child. As the narrative unfolds, the Rabbit experiences a deep bond with his boy owner and undergoes a profound transformation. However, when the boy falls ill and all his toys are to be burned to prevent the spread of disease, the Rabbit faces a critical challenge, putting at risk the possibility of _____.

Émile Zola, a French novelist, was one of the most prominent figures of the literary school of naturalism. Naturalism, a movement that aimed to depict everyday reality as accurately as possible, was greatly influenced by the scientific methods and discoveries of the 19th century. Zola, with his meticulous attention to detail and his desire to depict the world as it truly was, became a leading proponent of this literary school. However, Zola's works were not merely cold, scientific examinations of society. He also infused his novels with a deep sense of empathy and understanding for his characters, often drawn from the lower classes of society. Despite his controversial subjects, Zola believed that the role of the novelist was not to judge, but to present an accurate and truthful depiction of society. This belief, while noble, sometimes led to _____.
