In today's world, where environmentally conscious practices are increasingly imperative, companies are turning to eco-friendly alternatives for their products. The production of these green items is often more costly, but consumers are willing to pay a premium for them. The shift toward more sustainable options is not just a passing trend. It is a _____ change in consumer behavior and market dynamics. Companies that fail to adapt to this change risk being left behind. These eco-friendly products not only benefit the environment but also have a positive impact on the companies' brand image and bottom line.

Computer-Aided Engineering (CAE) is a pivotal tool in the realm of contemporary engineering. It encompasses a multitude of techniques, including Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD), and Multibody Dynamics (MBD). These techniques facilitate the prediction of product performance, evaluating its durability, safety, and resistance to potential stresses. Hence, CAE plays an integral role in the product lifecycle, helping to _____ the product's design and optimize product development. The use of CAE tools effectively reduces the necessity for physical prototypes, saving both time and resources.

Neil Armstrong, an aeronautical engineer and astronaut, occupies a singular position in the annals of humanity's space exploration as the first person to set foot on the moon. His footprints on the lunar surface have made him an enduringly _____ figure in global history. Armstrong's influence was clear throughout his extensive career in NASA, from his pioneering Gemini missions to his historic Apollo 11 lunar landing. Under his leadership, he pushed the boundaries of human potential, bringing about awe and inspiration. In addition to advancing space exploration, he played a crucial role in inspiring millions across the globe, kindling their curiosity and imagination.

The following text is adapted from Robert Louis Stevenson's 1883 novel 'Treasure Island.' Young Jim Hawkins, aboard the ship Hispaniola, is watching Long John Silver, the ship's cook.

Silver, though he was almost killed, as usual, had not only his own work to do, but a lot of Hawkins', too. He had to cook and serve; he had to clean, fetch, carry, and watch. And it was surprising, the amount of work the man could handle. He was always at it. And not only did he do it, but he did it cheerfully, whistling all the time. Hawkins watched him, fascinated.

4  Mark for Review

Which choice best states the main purpose of the text?

A: To demonstrate how Silver's determination and hard work help him overcome adversity on the ship.

B: To criticize Hawkins for not doing his share of the work and leaving all the tasks to Silver.

C: To portray Silver's remarkable work ethic and resilience, despite the demanding work aboard the ship.

D: To highlight the inhumane conditions aboard the ship Hispaniola, particularly for the ship's cook.

The following text is adapted from Douglas Adams' "The Hitchhiker's Guide to the Galaxy." Arthur Dent, a man suddenly thrust into interstellar travel, contemplates a spaceport bar.

The bar had that indefinable air about it of having seen too many people come and go and seen too little of them while they did. The carbonated Sirius Cybernetics Corporation Genuine People Personalities on the drinks dispensers were flat and lifeless. In fact, to say they had flat and lifeless personalities would be an insult to flat and lifeless things. Arthur felt an odd sensation of being out of sync with the universe.

5  Mark for Review

Which choice best represents the main idea conveyed in the text?

A: To express Arthur's excitement about exploring the bar in the spaceport and his odd sensation of the universe.

B: To describe the various types of drinks available at the spaceport bar and to explain the different personalities.

C: To highlight the bustling and lively nature of a spaceport bar and to describe Arthur's need for drinks.

D: To portray a sense of detachment and lifelessness at the spaceport bar that resonates with Arthur's own feelings.

Text 1

In many traditional Italian societies, the role of the cheesemaker is of great significance. The cheesemaker is not just an artisan, but also a mediator in social relationships, contributing to the economic and cultural life of the community. In some communities, the cheesemaker is a wise elder who possesses vast knowledge about the local environment and biodiversity.

Text 2

Researcher Dr. James Kofi, in his ethnographic study, argues that the role of the cheesemaker extends beyond their craft. According to Kofi, the cheesemaker is a custodian of traditional knowledge, including the science of fermentation, the maintenance of biodiversity, and the preservation of indigenous dairy breeds. Furthermore, Kofi emphasizes the cheesemaker's role in fostering community cohesion.

7 Mark for Review

Based on the texts, how would Dr. James Kofi (Text 2) most likely respond to the "role of the cheesemaker" discussed in Text 1?

A: By asserting that the cheesemaker's role is significantly undervalued, and their contribution extends far beyond their craft

B: By suggesting that the cheesemaker's role should be primarily focused on the economic benefits they bring to the community

C: By arguing that the cheesemaker's role should be limited to the production of cheese, and they should not be involved in social matters

D: By agreeing that the cheesemaker plays a crucial role in the community, but further highlighting their role as a custodian of traditional knowledge and a pillar of community cohesion

Jane Goodall's pioneering work with chimpanzees in Tanzania revolutionized our understanding of animal behavior and human evolution. By living among the chimpanzees and gaining their trust, Goodall observed behaviors previously unknown to science. Her most significant finding was that chimpanzees use tools, a trait once thought to be uniquely human. This discovery challenged existing definitions of humanity and blurred the lines between humans and other species. Goodall's work provided profound insights into the cognitive abilities of chimpanzees, offering a new perspective on the evolutionary connections between primates and humans. Her research continues to influence studies in various fields, reshaping how we view not only chimpanzees but also ourselves as a species.

8  Mark for Review

Which choice best states the main purpose of the text?

A: To discuss the influence of Jane Goodall's research on global climate change initiatives.

B: To describe the advancements in technology used for wildlife research since Jane Goodall's time.

C: To outline the significant impact of Jane Goodall's discovery of tool use in chimpanzees on our understanding of human evolution.

D: To compare Jane Goodall's research methods with those of other contemporary primatologists.

The Treaty of Baden, signed in 1714, was a peace agreement ending the War of Spanish Succession. Although it primarily involved European countries, the treaty had a significant impact on Asia, particularly on trade and territorial control. The Dutch, who were part of the treaty, were allowed to continue their monopoly over the spice trade in the Indonesian archipelago, thereby strengthening their control over the region. However, the British, who had also signed the treaty, saw this as an opportunity to expand their trade in India, leading to a power shift in the region.

10  Mark for Review

Which of the following, if true, would most directly undermine the idea that the Treaty of Baden led to the British expansion in India?

A: The British had already established strong trade links in India prior to the Treaty of Baden.

B: The Dutch saw the Treaty of Baden as an opportunity to consolidate their hold over the Indonesian archipelago.

C: The British's expansion in India was mainly due to internal political changes in India, not the Treaty of Baden.

D: The Treaty of Baden led to a significant reduction in the spice trade in the Indonesian archipelago.

Smart homes, equipped with advanced automation systems, are swiftly gaining popularity. These homes use Internet-connected devices to monitor and control lighting, heating, and electronic devices. However, cybersecurity expert Dr. James Foster suggests that these systems may be vulnerable to hacking. In his study, he analyzed several smart homes in Vancouver and found that despite having robust security, they had experienced more cyber attacks than traditional homes. Foster hypothesized that the complexity of smart home systems increases their exposure to cyber threats, potentially compromising their security despite advanced protective measures.

11  Mark for Review

Which of the following, if true, would most directly undermine Foster's hypothesis?

A: In some regions not in the study, smart homes are found to be less popular and are only recently being equipped with advanced automation systems.

B: In several regions not included in the study, there are many smart homes without advanced automation systems but have not experienced any cyber attacks.

C: In several regions not included in the study, the frequency of cyber attacks on smart homes does not correlate with the complexity of their automation systems.

D: In some regions in the study, the number of cyber attacks on electronic devices unrelated to home automation correlates directly with the complexity of the devices.

Scholar	Year	Estimation Method	Approximate Impact (Citations)
Smith	2015	citation analysis	1000-1500
Johnson	2018	subsequent works analysis	500-700
Williams	2020	hybrid analysis	800-1200
Brown	2017	citation analysis	1050-1600

Alan Turing, a pioneer in the field of computer science and artificial intelligence, was also a noted cryptanalyst. However, the methods used to quantify his contributions vary widely. Some scholars judge Turing's impact by the number of citations his works receive, while others measure the number of subsequent works that build on his ideas. The method used can greatly influence the perceived magnitude of Turing's contributions.

12 Mark for Review

Which choice best describes data from the table that supports the idea that the method used can greatly influence the perceived magnitude of Turing's contributions?

A: The study by Smith used citation analysis and produced the lowest estimated impact, while the study by Johnson used subsequent works analysis and produced the highest estimated impact. ⚙

B: The impact estimates produced by Smith and by Brown were similar to each other, while the estimates produced by Johnson and by Williams each differed substantially from any other estimate. ⚙

C: In their study, Johnson used subsequent works analysis to produce an estimated impact range with a minimum of 500 citations and a maximum of 700 citations. ⚙

D: The estimated impact produced by Smith exceeded the estimated impact produced by Brown, even though both scholars used the same method to estimate impact. ⚙

James Cook is renowned for his Pacific exploration during the 18th century. His voyages led to the mapping of previously uncharted territories, contributing significantly to the Western understanding of the Pacific region. Cook's third voyage, aimed at finding the Northwest Passage, ended with his death in Hawaii, but not before his crew had made contact with the local populace. The exchanges that took place during these encounters often resulted in cultural exchange. However, Cook's explorations were not without controversy. Some have criticized him for his role in the spread of European influence in the Pacific, arguing that his voyages led to the disruption of indigenous societies and economies. This criticism raises the question of whether Cook's explorations, despite their contributions to geographic knowledge, may have had the unintended effect of _____.

13 Mark for Review

Which choice most logically completes the text?

A: enhancing the scientific understanding of the Pacific.

B: promoting global awareness of the Pacific cultures.

C: undermining the sovereignty and customs of indigenous societies.

D: facilitating the spread of European diseases in the Pacific.

Coral reefs, often referred to as the 'rainforests of the sea', support an extraordinary diversity of life. However, they are facing severe threats due to climate change. Rising sea temperatures, more frequent and severe weather events, and ocean acidification due to increased carbon dioxide levels are all impacting coral reefs. The long-term survival of these ecosystems is in jeopardy. According to the Intergovernmental Panel on Climate Change (IPCC), if global warming continues to increase at the current rate, the majority of coral reefs worldwide could be lost by 2050. Scientists and conservationists are working tirelessly to find solutions to mitigate these impacts. However, the escalating climate crisis suggests that _____.

14 Mark for Review

Which choice most logically completes the text?

A: without more substantial and immediate global efforts to reduce greenhouse gas emissions, these measures will likely prove insufficient.

B: the majority of marine life will be able to adapt to the changing conditions in coral reef ecosystems.

C: most coral reefs will be able to recover naturally from the impacts of climate change within a few decades.

D: the impact of climate change on coral reefs is not as severe as previously thought, and recovery is expected soon.

The recent meeting of the environmental committee was both productive and enlightening. The members discussed various strategies to enhance the city's green initiatives. The committee focused on _____ sustainability, innovation, and community engagement. Each member brought forward proposals, such as implementing renewable energy sources, fostering technology-based solutions for waste management, and organizing community clean-up events. These discussions highlighted the committee's commitment to creating a more eco-friendly and sustainable urban environment.

While researching a topic, a student has taken the following notes:

- Leif Erikson was a Norse explorer from Iceland.
- He is believed to have been the first known European to set foot on continental North America, excluding Greenland, nearly 500 years before Christopher Columbus.
- His journey to North America was recorded in Norse sagas.
- Some historians propose that his landing place could have been in Newfoundland, Canada.
- Leif Erikson Day is celebrated in the United States on October 9th to honor his contribution to the discovery of North America.

26 Mark for Review

The student wants to convey the significance of Leif Erikson in the history of North American exploration. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Leif Erikson, a Norse explorer from Iceland, made a significant impact on the history of North American exploration by being the first European to land on the continent, a feat he accomplished nearly 500 years before Christopher Columbus.

B: Leif Erikson was a Norse explorer from Iceland, and his journey to North America is remembered every year on October 9th in the United States, known as Leif Erikson Day.

C: Leif Erikson, whose journey to North America was recorded in Norse sagas, is believed to have landed in Newfoundland, Canada, which is now celebrated as Leif Erikson Day in the United States.

D: As a Norse explorer from Iceland, Leif Erikson is known for his travels to North America, which were significant events documented in the Norse sagas.

While researching a topic, a student has taken the following notes:

- Ovid's *Metamorphoses* is a Latin epic poem, considered one of the most influential works of literature ever written.
- It has had a profound impact on Roman literature, inspiring authors like Virgil and Horace.
- Virgil's *Aeneid*, in particular, contains several allusions to *Metamorphoses*.
- Horace's *Odes* also reflect the influence of Ovid's work, particularly in its narrative style and thematic elements.
- *Metamorphoses*' themes of transformation and change have resonated with generations of Roman writers.

27 Mark for Review

The student wants to demonstrate the influence of Ovid's *Metamorphoses* on Roman literature. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Ovid's *Metamorphoses*, a monumental work in Latin literature, directly influenced Roman literary giants like Virgil and Horace, as evidenced by the allusions in Virgil's *Aeneid* and the stylistic elements in Horace's *Odes*.

B: Ovid's *Metamorphoses* is a renowned Latin epic poem that has themes of transformation, which are interesting to note in the context of Roman literature.

C: The *Metamorphoses* by Ovid, while a significant work, primarily impacted the development of Latin poetic structures rather than narrative content in Roman literature.

D: Ovid's *Metamorphoses*, though a notable Latin poem, had a limited influence on subsequent Roman literature and was overshadowed by the works of Virgil and Horace.

It is by no means _____ to observe the influence of classic science fiction on modern space exploration technology; indeed, many contemporary space engineers cite works like Arthur C. Clarke's novels as inspirational. However, some experts argue that practical scientific advancements, rather than science fiction, have played a more crucial role in shaping current space technologies.

3  Mark for Review

Which choice completes the text with the most logical and precise word or phrase?

A: difficult

B: irrelevant

C: uncommon

D: surprising

The following text is adapted from Ernest Hemingway's 1929 novel 'A Farewell to Arms.'
The protagonist, Lieutenant Frederic Henry, is an American serving as an ambulance driver on the Italian front during World War I.

I was always embarrassed by the words sacred, glorious, and sacrifice and the expression in vain. We had heard them, sometimes standing in the rain almost out of earshot, so that only the shouted words came through, and had read them, on proclamations that were slapped up by billposters over other proclamations, only to be hated by the soldiers.

4 Mark for Review

Which choice best states the main purpose of this passage?

A: The protagonist expresses his discomfort with terms like sacred, glorious, and sacrifice, as well as the phrase in vain, as they were often used in the context of the war, both in shouted speeches and on overlapping proclamations.

B: Lieutenant Frederic Henry fondly recalls the words sacred, glorious, and sacrifice, and the expression in vain, as they brought a sense of pride and patriotism to the soldiers during the war.

C: The protagonist, while serving on the Italian front, often used words like sacred, glorious, and sacrifice in his conversations with fellow soldiers to boost their morale.

D: The passage depicts the protagonist's admiration for the words sacred, glorious, and sacrifice, and the phrase in vain, as they reminded him of the noble cause of the war.

The following text is adapted from Tennessee Williams's 1947 play 'A Streetcar Named Desire.' Blanche DuBois, a Southern belle with a tragic past, has come to New Orleans to live with her sister, Stella, and her husband, Stanley Kowalski.

Blanche: I can't stand a naked light bulb, any more than I can a rude remark or a vulgar action. I tell you, I'm very adaptable. I can be just what you want me to be.
Stanley: You've got this all mapped out, haven't you? But you're not going to make a monkey out of me.

5 Mark for Review

Which choice best states the main idea of the text?

A: To underscore the conflict between Blanche's desire for refinement and Stanley's blunt pragmatism.

B: To highlight Blanche's manipulative nature and her ability to adapt to different situations.

C: To depict Stanley's frustration and his inability to understand Blanche's sophisticated demeanor.

D: To show the deep-rooted friendship that exists between Blanche and Stanley despite their differences.

The following text is adapted from Murasaki Shikibu's 'The Tale of Genji.' Genji, the protagonist, is questioning his life choices.

He was at a stage in life when he could not ignore the passing of time. The world was a dreary place, and he was beginning to see through its veneer. His many romantic endeavors, once so enchanting, now felt hollow. He found himself thinking of the Buddha's teachings, and of the impermanence of all things. 'What is the point of all these fleeting pleasures?' he wondered.

6 Mark for Review

Which choice best captures the primary purpose of this passage from 'The Tale of Genji'?

A: To convey Genji's growing disillusionment with his worldly lifestyle and his increasing inclination towards spiritual contemplation.

B: To illustrate Genji's dissatisfaction with his romantic relationships and his decision to sever all ties with his lovers.

C: To depict Genji's regret over not having dedicated his life to religious pursuits earlier, and his anger towards his past indulgences.

D: To showcase Genji's desire to renounce all worldly pleasures immediately and to become a Buddhist monk.

Text 1

Researcher Jordan Ellis conducted a study on the impact of urban green spaces on local temperature regulation. In his analysis of a mid-sized city, Ellis found that increasing the number of parks and green areas led to a modest decrease in average temperatures during summer months.

Text 2

Environmental scientists Lara Kim and Miguel Santos have emphasized that studies on urban green spaces often overlook long-term climate patterns. In their research on large metropolitan areas, they demonstrate that over several decades, urban green spaces significantly contribute to mitigating the urban heat island effect, leading to more substantial temperature reductions.

7 Mark for Review

Based on the texts, how would Kim and Santos (Text 2) most likely respond to Ellis's findings (Text 1)?

A: They would argue that Ellis's study underestimates the eventual increase in temperature due to global warming despite urban green spaces.

B: They would recommend that Ellis extend his study to include larger metropolitan areas to better understand the impact of green spaces.

C: They would encourage Ellis to consider the long-term effects of urban green spaces on temperature regulation over several decades.

D: They would claim that the impact of urban green spaces on temperature is more pronounced in mid-sized cities than in large metropolitan areas.

Jorge Luis Borges, a prominent Argentine author, is often recognized for his labyrinthine narratives and intricate storytelling. His works, such as 'The Library of Babel' and 'Ficciones', are characterized by their philosophical themes and the use of complex narrative structures. Borges' writing often explores abstract concepts and creates intricate puzzles for his readers to piece together. His unique approach to storytelling has significantly influenced magical realism, a genre he helped to define.

9  Mark for Review

Which choice best states the main purpose of the text?

A: To highlight the significant contributions of Jorge Luis Borges to literature, especially his influence on the genre of magical realism through his complex and philosophical narratives

B: To present a detailed biography of Jorge Luis Borges, focusing on his personal life and the influences that shaped his literary style

C: To analyze the common themes and narrative techniques in Borges' works, such as 'The Library of Babel' and 'Ficciones', and their impact on contemporary literature

D: To argue that Jorge Luis Borges' works, including 'The Library of Babel' and 'Ficciones', are considered the epitome of the genre of magical realism

In Paulo Coelho's *The Alchemist*, Santiago, a young shepherd, dreams of a treasure buried at the Pyramids of Egypt. He meets an old king who tells him about Personal Legend, one's destiny in life, and encourages Santiago to follow his dream. Santiago embarks on a journey across continents, during which he learns from an alchemist that the true treasure is not physical wealth, but self-discovery and spiritual enlightenment. By the end of his journey, Santiago finds the treasure within himself, symbolizing that the journey is more important than the destination.

10 Mark for Review

Which of the following, if true, would most strongly support the idea that Santiago's journey is more about self-discovery and spiritual enlightenment than about obtaining physical wealth?

A: Santiago, despite reaching the Pyramids, does not find any physical treasure but instead realizes that his experiences and personal growth are his true treasures.

B: Santiago, on his journey, encounters various difficulties and obstacles that hinder his progress towards the Pyramids, but gains greater wealth and enlightenment..

C: Santiago, while in the desert, meets other travelers who are also in search of their own Personal Legends and gains great enlightenment.

D: Santiago, before leaving his homeland, sells all his sheep to embark on his journey to the Pyramids and gains great physical wealth.

Edward Albee, a renowned American playwright, is best known for his play 'Who's Afraid of Virginia Woolf?' This play, characterized by its raw emotional intensity and psychological realism, was a defining piece of the 20th-century American drama. Although Albee's work is often interpreted as a critique of the American Dream, some critics argue that his true intention was to highlight the inherent human struggle for connection and understanding. To support this, they point to the play's central conflict – the bitter, yet poignant, interactions between the couple, George and Martha, and their desperate attempts to connect with each other.

11 Mark for Review

Which of the following, if true, would most effectively challenge the critics' interpretation of Albee's intention behind 'Who's Afraid of Virginia Woolf?'

A: Albee's other plays also feature characters who grapple with intense emotional conflicts and complex relationships.

B: In a series of interviews, Albee explicitly stated that his primary intention was to critique the American Dream, and the interpersonal conflicts were secondary.

C: Many of Albee's contemporaries in the American theatre scene also focused on the theme of human connection in their plays.

D: George and Martha's relationship is often cited as a representation of the dysfunctional relationships in modern society.

Book Title	Year	Genre	Average Reader Rating
The Handmaid's Tale	1985	Dystopian	4.2
Surfacing	1972	Literary Fiction	3.6
Alias Grace	1996	Historical Fiction	4.1
The Year of the Flood	2009	Science Fiction	3.8

Margaret Atwood, the renowned author, has penned numerous works across various genres. Literary scholars, Angela Carter and Sandra Gilbert, suggest that the reception of Atwood's work is significantly influenced by the genre in which she is writing. They argue that different genres elicit different audience reactions.

12 Mark for Review

Which choice best describes data from the table that support Carter and Gilbert's suggestion?

A: The dystopian novel 'The Handmaid's Tale' and the historical fiction 'Alias Grace' received high reader ratings, while the literary fiction 'Surfacing' and the science fiction 'The Year of the Flood' received lower ratings.

B: The dystopian novel 'The Handmaid's Tale' received the highest average reader rating, while the literary fiction 'Surfacing' received the lowest average reader rating.

C: The books 'The Handmaid's Tale' and 'Alias Grace' received similar reader ratings, while 'Surfacing' received a substantially lower rating.

D: The book 'The Year of the Flood' received a higher reader rating than 'Surfacing', even though both books belong to different genres.

Noam Chomsky is renowned for his contributions to linguistics and political philosophy. His theory of generative grammar asserts that language is a structured set of symbolic representations within the human mind, making it an inherent faculty of humans. Chomsky's political philosophy is rooted in anarchism and libertarian socialism, emphasizing the importance of individual liberty and social cooperation. He criticizes capitalist systems, arguing they perpetuate inequality and undermine democracy. However, critics of Chomsky argue that his linguistic theories lack empirical support and his political philosophy overlooks the practical challenges of implementing such systems. Despite this criticism, Chomsky's ideas have significantly influenced academic discourse and political thought. His work continues to spark debates, demonstrating the enduring impact of _____.

13  Mark for Review

Which choice most logically completes the text?

A: his unique perspectives on language and politics.

B: his controversial stance on capitalism and democracy.

C: his theoretical approach to the study of human language.

D: his criticism of existing political and economic structures.

Zadie Smith, a renowned British author admired for her unique literary style, has produced a number of critically acclaimed novels. Her works are celebrated for their insightful depiction of multiculturalism, identity, and the vibrant city life of London. Smith's ability to blend humor, pathos, and wit has established her as a distinctive voice in contemporary literature. One notable aspect of her writing is the use of colloquial language and dialects, reflecting the diverse backgrounds of her characters. However, some critics argue that her use of vernacular can be a double-edged sword. While it contributes to the authenticity of her characters, it can also lead to _____.

14 Mark for Review

Which choice most logically completes the text?

A: a potential barrier for readers unfamiliar with the specific dialects used, thus limiting the accessibility of her works.

B: a decline in the literary quality of her works, as colloquial language is often seen as less sophisticated.

C: an overemphasis on the cultural backgrounds of her characters, overshadowing other aspects of their characterization.

D: the portrayal of her characters as caricatures, thereby diluting the depth and complexity of her narratives.

Mining engineering is a branch of engineering that involves the practice, theory, technology, and science of extracting and processing minerals from a naturally occurring environment. Mining engineering is associated with many other disciplines, such as geology, mineral processing and metallurgy, geotechnical engineering and surveying. A mining engineer may manage any phase of mining operations, from exploration and discovery of the mineral resource, through feasibility _____ design, development of plans, production and operations to mine closure.

While researching a topic, a student has taken the following notes:

- Seahorses are peculiar creatures that inhabit the world's tropical and temperate coastal waters.
- They play a significant role in maintaining the health of seagrass and coral reef ecosystems.
- Seahorses feed on small crustaceans and plankton, controlling their population.
- They are a source of food for larger marine animals, thus maintaining a balance in the food chain.
- Seahorses provide habitat for small marine organisms by attracting them to the seagrass beds where they live.
- Their disappearance could therefore have disastrous consequences for these ecosystems.

25 Mark for Review

The student wants to emphasize the importance of seahorses in maintaining the health of marine ecosystems. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Seahorses maintain marine ecosystem health by feeding on small crustaceans and plankton, serving as food for larger animals, and providing habitats in seagrass beds, crucial for coral reefs.

B: Seahorses inhabit tropical and temperate waters, fascinating many with their unique appearance and highlighting marine conservation issues through their popularity in underwater photography.

C: While feeding on plankton and crustaceans, seahorses are notable for unique mating rituals and male pregnancy, intriguing many and drawing significant attention to various marine life aspects.

D: Adapting in color and size to their environments, seahorses camouflage to evade predators, an ability that contributes significantly to their survival and prevalence in marine ecosystems.

While researching a topic, a student has taken the following notes:

- Scientists have recently discovered a new exoplanet, named Kepler-442b.
- Kepler-442b is located about 1,206 light-years away from Earth.
- It is in the habitable zone of its star, meaning it could potentially support life.
- The planet is 2.34 times Earth's size and is likely to be rocky.
- Its orbit around its star is 112.3 Earth days.

26 Mark for Review

The student wants to present the discovery of Kepler-442b and its characteristics. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Scientists discovered Kepler-442b, a new exoplanet 1,206 light-years away, potentially supporting life in its star's habitable zone.

B: Kepler-442b, 2.34 times the size of Earth and likely rocky, orbits its star every 112.3 days and is in the habitable zone.

C: The new exoplanet Kepler-442b, found in the habitable zone, takes 112.3 days to orbit its star and could support life.

D: Located 1,206 light-years from Earth, Kepler-442b is a newly discovered exoplanet in the habitable zone and is larger than Earth.

While researching a topic, a student has taken the following notes:

- The Rosetta Stone was discovered in 1799 by French soldiers.
- It was found in a small village in the Delta region of Egypt called Rosetta.
- The stone is inscribed with a decree in three scripts: Greek, Demotic, and Egyptian hieroglyphs.
- The decree is dated to 196 BC.
- The Rosetta Stone was key in deciphering Egyptian hieroglyphs.

27 Mark for Review

The student wants to present the historical significance of the Rosetta Stone. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Discovered in 1799 in Rosetta, Egypt, the Rosetta Stone features a decree in three scripts and was crucial in deciphering hieroglyphs.

B: The Rosetta Stone, found by French soldiers and dating back to 196 BC, helped historians understand Greek and Demotic scripts.

C: In Egypt, the Rosetta Stone was discovered in 1799, inscribed with a decree from 196 BC in Egyptian hieroglyphs.

D: The Rosetta Stone, discovered in Rosetta in 1799, has a decree in three scripts and dates back to 196 BC, aiding in historical research.
