

Neil deGrasse Tyson, an astrophysicist, author, and science communicator, is one of the most ____ voices in the field of science today. His knack for making complex scientific theories accessible to the general populace has made him a beloved figure in popular culture. Tyson's role as the host of *Cosmos: A Spacetime Odyssey*, a continuation of Carl Sagan's groundbreaking series, has further cemented his reputation. His lucid explanations and charismatic delivery have expanded public interest in science, making the wonders of the universe more comprehensible to millions.

The following text is adapted from George Orwell's 1984. Winston, the protagonist, is having a conversation with O'Brien about the nature of the past.

"'Who controls the past controls the future: who controls the present controls the past,' repeated Winston obediently. 'And yet the past, though of its nature alterable, never has been altered. Whatever is true now was true from everlasting to everlasting. It is quite simple. All that is needed is an unending series of victories over your own memory. Reality control,' they called it: in Newspeak, 'doublethink.'"

4 Mark for Review

Which choice best states the primary purpose of this passage?

A: To illustrate Winston's lack of understanding about the concept of 'doublethink.'

B: To highlight the Party's manipulation of truth and reality through control of the past.

C: To showcase a philosophical conversation between Winston and O'Brien about the nature of time.

D: To describe the Newspeak language and its role in the society of Oceania.

The following text is adapted from Wilkie Collins's 1859 novel 'The Woman in White.'
Walter Hartright, a young art teacher, meets a mysterious woman dressed entirely in white who is in a state of distress.

There was something so strange and striking about her aspect that even in the darkness I could see she was in a state of extraordinary excitement. Her face was deadly pale, with a spasm at her heart. As I declared that she was unharmed, she shrank back from me and from the view of the moon, and trembling from head to foot, she murmured in her turn, 'Thank God!'

6  Mark for Review

Which choice best states the main purpose of the text?

A: To emphasize the contrast between the woman's physical appearance and her emotional state.

B: To suggest the possibility of a romantic relationship between Walter and the woman in white.

C: To convey the intense emotional state and the mysteriousness of the woman in white.

D: To imply that the woman in white is a supernatural being due to her strange behavior.

Text 1

Vladimir Mayakovsky, a renowned Russian poet, was often criticized for his unconventional style of writing and his challenging attitudes towards established norms. His unique poetic form, which did not adhere to traditional patterns, was seen as an attack on the literary establishment.

Text 2

Literary critic John Smith argues that Mayakovsky's style was not an attack, but rather a reflection of his individualistic approach to poetry. He believes that Mayakovsky's disregard for traditional forms was not a sign of disrespect, but rather an expression of his creative freedom.

7  Mark for Review

Based on the texts, how would John Smith (Text 2) most likely respond to the criticism of Mayakovsky's style (Text 1)?

A: By suggesting that Mayakovsky's style was not unique, but rather a common trend among poets of his time

B: By claiming that Mayakovsky's style was disrespectful and a deliberate attempt to undermine the literary establishment

C: By stating that Mayakovsky's style was difficult to understand due to his lack of adherence to traditional poetic forms

D: By positing that Mayakovsky's style was a reflection of his creative freedom, not a deliberate attack on the literary establishment

A recent article in a computer science journal discusses the development of a new algorithm designed to enhance data encryption techniques. The algorithm, based on advanced mathematical principles, aims to increase security in digital communications. The article emphasizes the algorithm's potential to resist quantum computing-based decryption methods, a growing concern in the field of cybersecurity.

8  Mark for Review

Which choice best states the main purpose of the text?

A: To highlight the challenges faced by current encryption methods due to the advent of quantum computing

B: To present a new algorithm that aims to improve data encryption and resist quantum computing attacks

C: To argue for the need for more research into advanced mathematical principles in computer science

D: To detail the technical workings of quantum computers and their impact on digital communications

Amedeo Modigliani, an Italian painter and sculptor, profoundly influenced modern portraiture. His innovative style, characterized by elongated necks and faces, departed from traditional portraiture, evoking an emotional depth not previously explored. Modigliani's work, though not widely recognized during his lifetime, has since garnered worldwide acclaim. His unique approach to portraiture has spurred artists to explore beyond conventional formats and techniques in their work, enriching the field of modern portraiture.

9  Mark for Review

Which choice best states the main purpose of the text?

A: To discuss the personal life and struggles of Amedeo Modigliani and how they influenced his art.

B: To highlight the significant impact of Amedeo Modigliani's unique style on modern portraiture.

C: To provide a detailed analysis of the artistic techniques used by Amedeo Modigliani in his portraits.

D: To argue for the recognition of Amedeo Modigliani as the greatest portrait artist of all time.

Estate taxes, also known as death taxes, are levied on an individual's estate or the total value of money and property, after their death. Critics argue that estate taxes are unfair as they amount to double taxation; once when the individual earns the money, and again after death. However, proponents believe that these taxes prevent the perpetuation of wealth inequality. A recent study by economist Paul Krugman suggests that estate taxes may actually stimulate economic growth by forcing the wealthy to reinvest their wealth back into the economy, rather than hoarding it.

10 Mark for Review

Which of the following, if true, would most strongly support Krugman's suggestion that estate taxes stimulate economic growth?

A: A report shows that the majority of the wealth in the country is held by a small percentage of the population.

B: A study finds that countries with higher estate taxes have a lower rate of philanthropic activities.

C: An analysis reveals that countries with high estate taxes have higher rates of capital investments and economic growth.

D: A survey indicates that most individuals believe that estate taxes are an unfair form of taxation.

In an extensive study examining voter behavior in various European parliamentary elections, researchers Helena Schmidt and Marco DiCaprio sought to challenge the traditional notion that voting does not influence a voter's attitude towards political parties. They focused on first-time voters and non-voters of similar demographics across several elections. Schmidt and DiCaprio then compared the attitudes of these groups towards the major political parties in their respective countries one year after the elections.

11  Mark for Review

Which finding from Schmidt and DiCaprio's study, if true, would most directly challenge the traditional view of voter behavior?

A: Both first-time voters and non-voters showed a tendency to align their attitudes with their socio-economic background, irrespective of their voting status in the election.

B: Non-voters were more likely to show a shift in their attitudes towards major political parties a year after the election compared to first-time voters.

C: First-time voters demonstrated significantly more positive attitudes towards the political parties they voted for, compared to similar non-voters, one year after the election.

D: There was no significant difference in the attitudes of first-time voters and non-voters towards major political parties one year after the elections.

Author	Year	Stylistic Device	Effectiveness Score
Cicero	45 BC	Rhetorical Questions	8.5-9.3
Virgil	19 BC	Alliteration	7.2-8.5
Ovid	8 AD	Metaphor	8.9-9.6
Seneca	65 AD	Anaphora	8.3-8.8

Monologues, a form of speech delivered by a single character, played a significant role in ancient Roman literature. However, the impact and effectiveness of monologues can vary depending on the author's writing style and the context in which they are used. Scholars William Smith and Amelia Bostic have proposed that the effectiveness of a monologue in Roman literature could be significantly influenced by the stylistic devices used.

12 Mark for Review

Which choice best describes data from the table that support Smith and Bostic's suggestion?

A: Cicero's use of rhetorical questions in his monologues yielded the highest effectiveness score, while Virgil's use of alliteration resulted in the lowest score.

B: The effectiveness scores of Cicero and Seneca, who both employed rhetorical devices, were similar, while the scores of Virgil and Ovid, who used other stylistic devices, differed significantly from the others.

C: The effectiveness score for Ovid's use of metaphor exceeded that of Virgil's use of alliteration, despite both authors writing during the same historical period.

D: Seneca's use of anaphora in his monologues resulted in a higher effectiveness score than Cicero's use of rhetorical questions, even though both authors were renowned for their oratory skills.

Hieroglyphics, an intricate system of writing using symbols and pictures, was the backbone of ancient Egyptian literature. The hieroglyphic script was primarily used for formal and religious texts, such as royal decrees and religious rituals, while a cursive form known as hieratic was employed for more mundane documentation. The preservation of these texts over centuries has offered a comprehensive understanding of ancient Egyptian civilization. However, the complexity and aesthetic richness of hieroglyphics often made it a less practical form of communication in everyday life. As a result, some Egyptologists argue that despite its profound cultural significance, hieroglyphics may have inadvertently led to _____.

13 Mark for Review

Which choice most logically completes the text?

A: a decline in the overall literacy rate among the ancient Egyptian populace. ⚙

B: an increase in the use of other forms of writing in neighboring civilizations. ⚙

C: a widespread misunderstanding of religious texts among the common people. ⚙

D: a limited accessibility to written information for the common people. ⚙

The humpback whale (*Megaptera novaeangliae*) undergoes a fascinating life cycle that stretches across diverse ecosystems. Born in tropical waters, these whales migrate thousands of miles to nutrient-rich polar regions, where they feed on a diet of krill and small fish. Their massive body size, up to 16 meters in length, necessitates a high intake of food during the feeding season. The whales then migrate back to warmer waters during the breeding season. What's intriguing is that, despite the abundance of food in polar regions, humpback whales do not eat during the breeding season. Scientists have long speculated about the reason for this intriguing behavior, suggesting that the whales may be conserving energy for the long migration. However, recent studies indicate that the whales' fasting during the breeding season may be due to _____.

14 Mark for Review

Which choice most logically completes the text?

A: the decreased availability of krill and small fish during the breeding season.

B: the preferential feeding habits of humpback whales for polar aquatic life forms.

C: the high energy expenditure of humpback whales during the migration process.

D: an evolutionary adaptation that prevents the distraction of feeding during mating rituals.

The unique flora and fauna of Madagascar have evolved in relative isolation due to the island's separation from mainland Africa; this separation is a result of a geological event known as continental drift, whereby the Earth's tectonic plates move gradually over time—in this case, causing Madagascar to _____ from the African continent.

15  Mark for Review

Which choice completes the text so that it conforms to the conventions of Standard English?

D: Additionally,

While researching a topic, a student has taken the following notes:

- The Greek tragedy 'Prometheus Bound' features the Titan Prometheus, who defies the gods by stealing fire and giving it to humanity.
- Zeus, the king of the gods, punishes Prometheus by having him bound to a rock where an eagle eats his liver daily.
- In 'The Iliad', Zeus is depicted as the most powerful god, but also as temperamental and unpredictable.
- In 'The Odyssey', Athena, the goddess of wisdom, assists the hero Odysseus throughout his journey.
- The god Apollo is often portrayed as the god of music, truth, and prophecy, and the sun.

25 Mark for Review

The student wants to compare the depiction of Zeus in 'Prometheus Bound' and 'The Iliad'. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: In 'Prometheus Bound,' Zeus is portrayed as a harsh and punitive deity, exemplified by his severe punishment of Prometheus for aiding humanity.

B: Both 'Prometheus Bound' and 'The Iliad' highlight Zeus's assistance to human heroes, as seen in his punishment of Prometheus and his powerful presence in the Trojan War.

C: Zeus's role in 'Prometheus Bound' as a deity who supports the arts, similar to Apollo's portrayal as the god of music and truth, contrasts with his role in 'The Iliad' as a warlike figure.

D: In both 'Prometheus Bound' and 'The Iliad,' Zeus's relationship with Athena, the goddess of wisdom, plays a crucial role in the narrative.

The student is studying the feeding behavior of the Arctic tern (*Sterna paradisaea*), a seabird known for its long migratory patterns. The notes indicate:

- The Arctic tern has a varied diet, mainly consisting of fish and small marine invertebrates.
- It typically catches its prey by diving from the air into the water.
- Occasionally, the Arctic tern also picks insects off the surface of the water while flying.
- During long migrations, it may also feed on small prey caught in mid-air.

26 Mark for Review

The student wants to highlight a difference in the Arctic tern's feeding methods. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: The Arctic tern mostly catches its prey by diving into the water, in contrast to occasionally snatching insects from the water's surface or catching prey in mid-air.

B: The Arctic tern exclusively feeds on fish and marine invertebrates, either by diving into the water or catching them in mid-air.

C: Unlike other seabirds, the Arctic tern only feeds by diving into the water, ignoring other food sources.

D: The Arctic tern, during its long migrations, relies solely on catching prey in mid-air for sustenance.

While researching the history of ancient Rome, a student has taken the following notes:

- Julius Caesar was a key figure in the transition of Rome from a republic to an empire.
- He was assassinated in 44 BCE due to fears that he was becoming too powerful and threatening the Republic's existence.
- Augustus, known as Octavian before he became emperor, was Caesar's adopted heir and the first Roman emperor.
- Augustus significantly expanded the Roman Empire and initiated a period of relative peace known as the Pax Romana.

27 Mark for Review

The student wants to draw a comparison between Julius Caesar and Augustus regarding their impact on the Roman state. Which choice most effectively uses relevant information from the notes to accomplish this goal?

A: Both Julius Caesar and Augustus were assassinated due to their immense power and influence in Roman politics.

B: Julius Caesar and Augustus both initiated significant expansions of the Roman Empire during their rule.

C: Augustus continued the policies of Julius Caesar by further threatening the existence of the Roman Republic.

D: While Julius Caesar played a pivotal role in ending the Roman Republic, Augustus established the Roman Empire and ushered in a period of peace and expansion.

Text 1

Philosopher John Searle has proposed a theory of language known as 'speech act' theory. According to this theory, language is not just a system of communication but also a system of action. When we use language, we are performing actions, not just conveying information. Searle argues that understanding these actions is fundamental to understanding language itself.

Text 2

Ludwig Wittgenstein, a philosopher of language, proposed a different view on the theory of language. He suggested that language is primarily a social activity, governed by rules and conventions. According to Wittgenstein, understanding these rules and how they are used in different social contexts is key to understanding language. He dismissed the idea that language is about performing actions, arguing that this perspective focuses too much on the individual speaker and not enough on the social context.

7 Mark for Review

Based on the texts, how would Wittgenstein (Text 2) most likely respond to Searle's 'speech act' theory discussed in Text 1?

A: By challenging it, asserting that it overemphasizes the role of the individual and neglects the social aspects of language

B: By supporting it, suggesting that it complements his own view of language as a social activity governed by rules

C: By expanding on it, claiming that language involves not only performing actions but also following complex social rules

D: By refuting it, arguing that the idea of language as action is outdated and has been superseded by more modern theories

The Bill of Rights, the first ten amendments to the United States Constitution, were ratified in 1791. They were designed to protect the basic rights of U.S. citizens, guaranteeing the freedom of speech, assembly, and worship. Historian Tom Schiller argues that the Bill of Rights was not just a protective shield but also a tool for societal change. He suggests that the broad interpretations of these amendments have led to significant societal changes, such as the Civil Rights Movement in the 1960s. His contention is that the Bill of Rights has been a catalyst for progress.

10  Mark for Review

Which statement, if true, would most directly challenge Schiller's thesis?

A: The freedom of speech is considered to be the most important amendment in the Bill of Rights.

B: The Bill of Rights was created as a response to the concerns of Anti-Federalists who favored strong state governments.

C: The tenth amendment reserves powers to the states, which has led to significant regional variations in laws.

D: In several historical instances, the interpretation of the Bill of Rights served to resist societal change rather than promote it.

During the Joseon Dynasty in Korea, scholar-officials were known for their calligraphic skills. They believed that the character of an individual was reflected in their calligraphy. Historian Kim Jang-yeol and his team studied calligraphy samples from this era and noted differences in script between scholar-officials who held high and low-ranking positions. Kim hypothesized that higher-ranking officials, with more rigorous training and responsibilities, exhibited a more refined and disciplined script than their lower-ranking counterparts.

11  Mark for Review

Which of the following, if true, would most directly support Kim Jang-yeol's hypothesis?

A: Lower-ranking officials often had other duties that diverted their attention from practicing calligraphy.

B: High-ranking officials had access to better quality ink and paper, which could affect the quality of their script.

C: Some high-ranking officials were known to deliberately adopt a less refined script style to appear more humble.

D: A comparative study of calligraphy samples shows a consistent pattern of more complexity and precision in the script of high-ranking officials.

Scholar	Year	Analytical Method	Number of Themes Identified
Wilson	2018	Psychoanalytical critique	3-5
Jones	2020	Existentialist analysis	7-9
Smith	2019	Formalist criticism	5-7
Brown	2017	Marxist critique	2-4

Samuel Beckett, a Nobel laureate, is one of the most influential playwrights of the 20th century. His works often revolve around themes of despair, absurdity and isolation. While his plays are considered profound and impactful, different interpretations and critical analyses may yield vastly different understandings of his work. Literary scholars Robert Wilson and Clara Jones have suggested that the interpretation of Beckett's plays can be significantly influenced by the methodology used in analyzing his work.

12 Mark for Review

Which choice best describes data from the table that support Wilson and Jones's suggestion?

A: The study by Smith used formalist criticism and identified the fewest themes, while the study by Jones using existentialist analysis identified the most.

B: The number of themes identified by Brown and Wilson, using Marxist critique and Psychoanalytical critique respectively, differed considerably, while the themes identified by Smith and Jones, each using different methods, also showed substantial differences.

C: The study by Jones using existentialist analysis identified a similar number of themes as the study by Smith using formalist criticism.

D: The number of themes identified in Beckett's plays by Wilson exceeded the number identified by Brown, even though both scholars used different analytical methods.

Franz Kafka, a prolific writer from the early 20th century, is often seen as one of the most influential figures in the realm of modern literature. His unique style, characterized by a profound sense of alienation, anxiety, and guilt, has been termed as 'Kafkaesque', a term now commonly used in the English language to describe situations reminiscent of his unsettling narratives. Kafka's works, though widely renowned, were mostly published posthumously, much against his expressed wishes. He had, in fact, asked his close friend Max Brod to destroy all his manuscripts after his death. However, Brod chose to disregard his friend's dying wish, believing Kafka's works to be literary masterpieces that deserved to be shared with the world. This choice by Brod has led to much debate among literary scholars, with some arguing that his action was a betrayal of a personal trust, while others contend that it was a necessary act of cultural preservation. This dichotomy has further intensified the enigma that is Kafka, arguably contributing to the _____.

13  Mark for Review

Which choice most logically completes the text?

A: diminution of Kafka's posthumous literary reputation.

B: proliferation of inaccurate interpretations of Kafka's work.

C: discrediting of Max Brod's credibility as a literary executor.

D: increased intrigue and fascination surrounding Kafka's life and works.

Ancient Greek literature is renowned for its innovative use of paradox, a literary technique that presents a seemingly self-contradictory or absurd statement, which, upon reflection, reveals a profound truth. Many Greek playwrights, including Sophocles and Euripides, often employed paradox to challenge their audience's expectations and provoke deeper thought. For instance, in Sophocles' *Oedipus Rex*, the protagonist's attempt to avoid his prophesied fate paradoxically leads him to fulfill it. Similarly, in Euripides' *Medea*, the heroine's quest for justice through revenge paradoxically results in her personal ruin. However, despite its widespread use, some scholars argue that the employment of paradox in ancient Greek literature could potentially _____.

14 Mark for Review

Which choice most logically completes the text?

A: undermine the credibility of the characters, making their actions seem irrational and their motivations unclear.

B: obscure the intended message, making the narrative complex and potentially difficult for the audience to comprehend.

C: elevate the status of minor characters, thus diverting the audience's attention from the main plot.

D: promote a sense of superiority among the audience, as they may feel intellectually superior for understanding the paradoxes.

While conducting research, a student compiled the following data:

- Hummingbirds can hover in place due to their unique wing motion, creating lift on both the upstroke and downstroke.
- The aerodynamics of this hovering mechanism were not fully comprehended for a long time.
- Aerodynamics expert Dr. Lina Kim utilized high-speed cameras and computational models to analyze the wing movement.
- Her study indicated that vortices generated by the wingtips are crucial for sustaining lift.
- Kim concluded that these vortices reduce the energy cost of hovering by 30%.

24 Mark for Review

The student aims to accurately present the study and its investigative approach. Which option most effectively employs the pertinent details from the notes for this purpose?

A: Research demonstrated that hummingbirds, capable of reducing the energy cost of hovering by 30%, benefit from unique vortices generated by their wingtips.

B: To decipher the mechanics of hummingbirds' hovering, Dr. Lina Kim employed high-speed cameras and computational models to analyze their wing movements.

C: Dr. Lina Kim explored the aerodynamics behind hummingbirds' ability to hover, focusing on the role of wingtip vortices.

D: Aerodynamics expert Dr. Lina Kim discovered that the vortices from hummingbirds' wingtips are integral to sustaining lift, reducing the energy cost of hovering by 30%.

While studying a historical event, a student gathered the following information:

- The Battle of Thermopylae in 480 BC was notable for the stand of 300 Spartans against a much larger Persian army.
- Historians long debated the exact strategies employed by Spartan King Leonidas.
- Historian Dr. Emily Zhao used advanced topographical analysis and ancient military texts to reconstruct the battle tactics.
- Her research suggested that Spartan phalanx formations were critical in maximizing their defensive position.
- Zhao concluded that these formations increased Spartan combat efficacy by 50%.

25 Mark for Review

The student seeks to accurately convey the study and its research methodology. Which option most effectively utilizes the pertinent details from the notes for this purpose?

A: Studies showed that the 300 Spartans at Thermopylae, who improved their combat efficacy by 50%, relied heavily on phalanx formations.

B: To understand the strategies of King Leonidas at Thermopylae, Dr. Emily Zhao employed topographical analysis and reviewed ancient military texts.

C: Dr. Emily Zhao investigated the Battle of Thermopylae, focusing on the impact of Spartan phalanx formations.

D: Historian Dr. Emily Zhao discovered that Spartan phalanx formations were key to their 50% increase in combat efficacy at the Battle of Thermopylae.

While researching lithium-ion batteries, a student compiled the following notes:

- Lithium-ion batteries are crucial in modern electronics, but their tendency to degrade over time reduces efficiency.
- The degradation process has not been fully understood historically.
- Chemical engineer Dr. Alex Rutherford utilized spectroscopy and electron microscopy to study the degradation.
- His research identified that microstructural changes in the cathode material are a primary cause of efficiency loss.
- Rutherford estimated that addressing these changes could enhance battery lifespan by up to 40%.

26 Mark for Review

The student aims to accurately present the study and its methodology. Which choice most effectively uses the relevant information from the notes to accomplish this goal?

A: Research indicated that lithium-ion batteries, which can potentially extend their lifespan by 40%, suffer efficiency loss due to cathode material changes.

B: To investigate the degradation of lithium-ion batteries, Dr. Alex Rutherford used spectroscopy and electron microscopy to examine the cathode material.

C: Dr. Alex Rutherford focused on the microstructural changes in the cathode material of lithium-ion batteries to understand their efficiency loss.

D: Chemical engineer Dr. Alex Rutherford discovered that changes in the cathode material lead to efficiency loss in lithium-ion batteries, suggesting a 40% potential increase in lifespan.

In the realm of astrophysics, the phenomena of gravitational lensing, where massive celestial bodies like galaxies warp spacetime, create luminous arcs in the _____ observations of distant quasars.
